

Gestión Fuente Liviana S.L.

Scope of the environmental management system

The Environmental Management System of GESTIÓN FUENTE LIVIANA S.L. complies with the requirements of the UNE-EN ISO 14001: 2015 standard for the collecting, packaging and storage of natural mineral water, as well as related activities.

The environmental management of GESTIÓN FUENTE LIVIANA S.L. is associated with the plant located at — Carretera de Cañete s/n. 16316 HUERTA DEL MARQUESADO (Cuenca). As well as its area of influence.

Its purpose is to describe clearly the environmental management of the company, defining, among other aspects:

- The context, the stakeholders and their needs and expectations.
- The risks and opportunities related to environmental matters, legal requirements and other requirements.
- Actions planned to prevent and reduce the undesired effects of those risks.
- The processes that are necessary to prepare for and respond to potential emergency situations.

This is to ensure that the Environmental Management System achieves the expected results and continuous improvement.
